

COP 1000, Principles of Computer Programming

Assignment 1: (10 points)

Write a python program that shows the following:

- Your name
- Your hobby
- What you expect to learn from the class

The output may look like the following: (feel free to be creative)

Anindya Paul

I like spending time with my family, exercise, garden and read.

I like to be able to write programs in Python and learn how to troubleshoot my programs.

Submit your .py file and your screenshots in the Assignment 1 Assignments folder.

Deliverables:

- 1.Take a screen shot of your ran program in paste it in a word file
- Submit your .py file/s
- Write a few sentences about what you learnt from writing the program and if you had faced any challenges. If you have faced challenges, I would like to know how you addressed those challenges.

Purpose: The purpose of this assignment is to make sure that everybody has their environment set up and ready for the class. They should also have a basic understanding of the materials covered in the first chapter.

Program Rubric showing the breakdown of points:

Deliverables	Points
Screen shot of the ran program	2
.py program files	5
Reflections & Challenges	3
